

## Kee Walk

### Features & Benefits

Kee Safety products have many important features and Kee Walk is no exception. Features such as the materials of construction, the standards compliance and the ease of use are all very important but what do they mean to the customer?

It is the way in which these features help the customer which is most important. Always remember Customers don't buy features, they buy the benefit that the feature provides for them.

Below we have laid out the most important Features of Kee Walk and have explained how these features benefit the customer so that you can easily explain them to the customer as part of your sales presentation.

We hope that you find this helpful.

Kind Regards,

### Kee Walk

#### Features & Benefits

Kee Safety Kee Walk Feature	Customer Benefit
Kee Walk is a range of modular pre assembled longitudinal, traverse walkways and steps for roofs up to 35 degree pitch	The Kee Walk system can be used to provide a safe roof top walkway on any configuration of roof slope which may be variable
The walkway is CE approved to EN 516 Class1-C (Prefabricated Accessories for Roofing – Installations for roof access – Walkways, treads and steps)	The customer can be assured that Kee Walk complies with all of the relevant standards for roof top safety and therefore their staff and contractors have the best possible protection
The Kee walk Glass re enforced nylon treads are Fire Rated to Class HB of UL94 (Harmonised with ISO 9772).	The Kee Walk roof top walk way will have the same if not better fire rating than the roof itself
The Kee Walk treads have been tested to provide Slip Resistance Compliant to BS 4592.	The customer can be assured that the treads are safe to walk on in all weather conditions
Kee Walk is ideal for use on flat, barrel and sloping roofs, the system’s step and traverse options allow safe access to be created for virtually any roof configuration from 0° to 35°	Kee Walk is not restricted to use on flat roofs. It can also be used on curved or barrel roofs to provide safe access
The modular system provides a simple approach using standard pre-assembled 1.5 & 3m (5’ & 10’) lengths joined together by a 100mm (4”) long straight connector	Kee Walk is easily and quickly set up on site and mounted to the roof with no requirement for any on site assembly or fabrication
The Kee Walk treads are 625mm wide	Kee Walk provides a walkway which is wide enough to comply with the general requirements for width of walkways and
The Glass re enforced Nylon treads have excellent UV stability	Kee Walk is suitable for all environments around the World and will not suffer from UV degradation even under extreme sunlight
Kee Walk has mounting options for standing seam, metal profile and membrane roofs.	Kee Walk is suitable for all roof types that are commonly found on site
Kee Walk systems can be free standing and non penatrive if required	Kee Walk can also be used on roofs where it is not possible or not required to fix the walkway to the roof material
The Kee Walk modules can be adjusted on site for roof pitch to ensure a horizontal walkway at all times	There is no requirement for fabrication or the use of bespoke brackets during installation making the installation process quick and easy
The Kee Walk longitudinal sections weigh less than 9kg/m and are easily handled by two workers	Placing the Kee Walk on the roof top ready for fixing is straight forward and does not require any special tools or
Once installed Kee Walk provides safe access and demarcation of allowable walking routes	Roof top access is safe and can be controlled to pre determined safe areas
Kee Walk protects the roof cladding material from wear due to foot traffic	The expensive metal roof cladding can be prevented from getting damaged and the manufacturers warranty is
Kee Walk can be used in conjunction with Kee Guard and Kee Guard Topfix to provide a walkway with handrail	Walk way with either single or double sided handrail can be supplied from the same manufacturer providing a collective
Kee Walk can be used in conjunction with Kee Safety bespoke stepovers and platforms	Safe access can be provided across roof mounted pipework and other plant or equipment in a single installation from the same supplier
The Kee Walk system is CE Marked in accordance with the Construction Products Directive	Kee Walk complies with all of the relevant legislation and so the customer can be assured that they are getting a quality system that has been tested for compliance with the standards
